REMARKS

50X1-HUM

1. The Trencin (Trencianske Biskupice) (P 49/T 58) military and civilian airfield was about 900 x 1,600 meters. The soil was loamy, firm and sodded level. *
2. Large workshops for overhauling military and civilian aircraft were at the field. During the war an aircraft plant, the Mraz Firm, was housed there. Military and civilian personnel were employed in the workshops. 50X1-HUM
3. The 3rd Bmr Regt, equipped with approximately 16 to 18 IL-16s, 4 twin-engine Siebels and approximately 6 twin-engine aircraft of Soviet make, was stationed at the field. ***
4. A small hangar for private planes and aircraft of the local Aeroclub was under construction at the side of the large main hangar. 50X1-HUM

* Comment. The size of the field is reported for the first time.*** Comment. A 3rd Bmr Regt and aircraft of IL-16 type have not been observed previously.

To date, only the 2nd, 24th and 25th Bmr Regts have been determined to be in Czechoslovakia. A previous report indicated that the 25th Regt is stationed in Prague-Kbely. The present location of the 24th Regt is not known. Prior to December 1942, the 30th GA Regt, equipped with IL-2s, was stationed in Trencin. This regiment is believed to be still stationed in Trencin. 50X1-HUM
